

# Analyze, Report and Improve Your Content with MadCap Analyzer

Make sure your content is organized and free of errors by automating in minutes what would take weeks for a technical editor to review and identify

## Benefits

- Scan projects to find and fix critical issues such as broken links, missing images, duplicate TOC items, undefined variables, condition tags and more
- Improve content quality and structure by maximizing content reuse with automated suggestions for frequent or similar phrases, snippets, variables, file tags, index keywords and more
- Create custom reports and share information with documentation teams for just about any type of information included in your content
- Scan projects to ensure your documentation conforms to accessibility guidelines such as Section 508 (US requirement) and WCAG (Web Content Accessibility Guidelines)

Argo Translation Uses MadCap Lingo and Flare to Optimize Localization Consistency and Cut Project Time by Over 25 Percent
