

madcap
BLAZE™

MadCap Blaze™ — The native XML content authoring application for long printed documents, such as technical manuals, policy and procedure manuals, illustrated guides, and more.

Benefits

- Efficient topic-based authoring and single-sourcing
- Share and update content across projects using the Master Project feature
- Build deliverables at the command line and save them to a specified network location
- Multiple document outlines in one project
- Multiple page layouts in one project
- Dynamically adjust page numbers to next or previous, above or below, using smart cross-references
- Easily translate content with direct MadCap Lingo™ integration

Run and view multiple reports

Define multiple deliverables in a single project

Define the content for your deliverables

Open multiple topics simultaneously

Easily create headers with variables

Easily create footers with auto page numbers
