

Seamless Contribution and Review with MadCap Contributor

Now anyone in your organization, including subject matter experts and reviewers, can easily edit, review topics, make annotations, and contribute content with a simple, easy-to-use interface

Benefits

- Streamline the authoring process by allowing subject matter experts (SMEs) and content contributors to quickly add content to your documentation
- Send revised or annotated content back and forth with direct Outlook® and SharePoint® integration
- Ensure consistent formatting by avoiding the hassle of converting content from Microsoft® Word® and other formats by using pre-defined templates and styles
- Advanced review and approval process includes track changes, automated review notifications, accept or reject changes, and more
- Send single or multiple topics out to reviewers and SMEs for efficient content creation and review
- Generate PDF and XPS documents for print review directly from MadCap Contributor

"I really see Flare as the shining light in documentation authoring. Adding MadCap Lingo, Contributor and Analyzer into that mix has given us a powerful suite of tools for bringing a superior documentation experience to our users."

Alex Johnson | IT Training Lead, Fitness First Group
