

Streamline Your Translation with MadCap Lingo

Improve translation efficiency with the fully integrated translation management solution

Benefits

- Reduce common translation workflow redundancies by providing all your translation needs in one integrated environment — including editing, reviewing, terminology and project management
- Easily package all files required for translation in a single click using MadCap Lingo's unique Project Packager™
- Obtain detailed reports for accurate estimates and visibility into translation requirements for a clear understanding of what needs to be translated, including word counts, segment counts and more
- Reduce translation costs and time-to-market with built-in translation memory technology (TMX support) and advanced translation features such as alignment, termbases and more

“

... we're seeing growing demand for translation projects using MadCap Lingo and Flare. The quality, consistency and efficiency we're seeing with the seamless workflow enabled by these products represent the future of translation and localization.”

Peter Argondizzo | Argo Translation, Inc.
