**SEARCH OPTIMIZER™**

## MadCap Search Optimizer™ — The Next Best Thing to Using Flare

### Benefits

Provide users of legacy authoring applications with the best WebHelp search experience available.

- Search results based on relevance instead of the alphabet
- Wildcard searches (an industry first)
- Instant search results
- And more...

## Further enhance your legacy application experience with the free MadCap Toolbar:

Build your web or intranet documentation from your legacy tool such as Adobe RoboHelp, ComponentOne Doc-to-Help, WebWorks Publisher, or Author-It, and still provide your users with the most advanced WebHelp search available. Just run the new MadCap Search Optimizer on your legacy documentation before you publish it to your server.

Your users then enjoy these advanced benefits and more by downloading the free MadCap Toolbar.

### Free MadCap Toolbar Also Lets Users:

- Collapse or expand the TOC, remove search highlighting, and collapse or expand all dynamic Help effects—without programming required
- Securely store and easily access confidential data such as credit card info, passwords, and form data for any websites using the MadCap Vault
- Take snapshots of web pages and more using features from MadCap Capture

### Flare Users:

Flare users do not need the Search Optimizer. All of the above features are available when using Flare and the free MadCap Toolbar.
